Professional Summary

Client-focused IT Support professional with hands-on experience building SharePoint and Power Apps solutions to improve user support and reduce recurring technical issues. Strong communicator and problem solver with a passion for helping users achieve their goals. Skilled in troubleshooting, user training, and delivering clear, step-by-step solutions that improve user satisfaction.

Technical Skills

SharePoint & SharePoint Lists • Power Apps • Microsoft 365 Support • Troubleshooting & Technical Support • User Access & Authentication (SSO concepts) • HTML, CSS, JavaScript • Data Analysis & Process Improvement

Professional Experience

Quality Engineer Intern — i.c.stars

Jan 2026 – Present

- Reduced recurring IT issues by analyzing user problems and developing a self-service troubleshooting tool
- Built Power Apps integrated with SharePoint to improve user support access and efficiency
- Designed an SSO system using SharePoint Lists to simulate secure authentication
- Gathered user feedback and improved usability based on real user needs
- Used data insights to prioritize improvements and enhance overall user experience
- Collaborated with team members to test functionality and ensure reliable performance

Ticket Scanner — Vail Resorts

Dec 2023 – Jan 2025

- Processed 400+ daily transactions with high accuracy in a fast-paced environment
- Verified customer data and enforced compliance procedures to maintain data integrity
- Monitored system activity and identified irregularities to support operational security
- Documented issues clearly to improve tracking and resolution

Project

IT Self-Service Support Tool (Power Apps + SharePoint)

- Developed a troubleshooting platform to reduce help desk ticket volume
- Created step-by-step guides, videos, and documentation to support users
- Implemented role-based access (Admin/User) to simulate real-world environments
- Focused on improving user experience and reducing dependency on IT support
